

Precision. Accuracy. Consistency.

AT YOUR FINGERTIPS WITH CUSTOM COMPOUNDING.

WHY DO YOU NEED A CUSTOM FORMULATION?

So many variables must be considered when designing a medical device. What if you could eliminate some of those variables? How accurate could your medical device be if you knew you would always have a tightly controlled silicone part? Saint-Gobain can deliver that level of consistency with custom compounding. By engineering your application-specific material properties and removing material variability we provide silicone parts that perform consistently over their useful life – parts that will exceed your expectations.

WE ADD MORE VALUE, NOT MORE COST

With a price similar to off-the-shelf products you currently use, you no longer have to settle for parts made with common materials. And with a guaranteed continuity of production available from Saint-Gobain, there is every reason to take advantage of our capabilities.

WORKING WITH THE BEST

Our custom compounding capability is about more than just adding colors. We draw on our extensive knowledge of polymer chemistry, fine-tuning material properties to achieve exactly the performance you need. We combine this with decades of manufacturing experience enabling us to meet your needs in a way no other silicone manufacturer can.

HOW CAN I LEARN MORE?

Call us at (800) 236-7600 or email us at medical@saint-gobain.com to get more information. Or schedule a “Lunch and Learn” with a Saint Gobain representative at www.medical.saint-gobain.com.

Features / Benefits

Precise material formulations that give you a tightly controlled silicone part.

More value, not more cost

Global presence, local resource

Guaranteed material production

Extensive polymer knowledge and over 30 years of silicone processing experience

IT'S ALL IN THE NUMBERS

PHYSICAL PROPERTIES

Custom compounding is a collaborative process. Our experienced team will work with you to understand the end use and critical product needs. From there, we will define the material that is best suited for your application, and create a custom formulation tailored to optimizing your end product performance. We can fine-tune properties to meet your required criteria in the following areas:

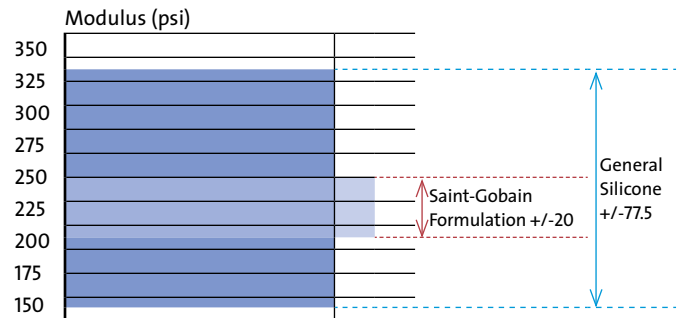

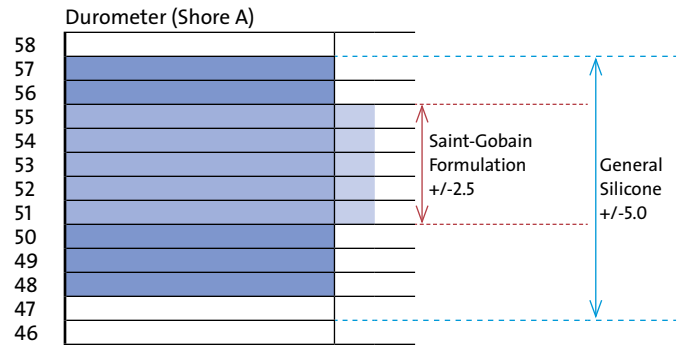

- Tear Strength
- Modulus
- Compression Set
- Durometer
- Tensile / Elongation

MATERIAL PURITY

Medical applications have strict requirements. We understand the importance of properties such as high clarity and low extractables, and deliver parts that meet the necessary standards for your application.

SPECIALTY FORMULATIONS

Need a material solution for a specialty application? We offer custom formulations such as self-bonding and gamma-resistant silicones.

Global Presence, Local Resource
